

### **ABSTRACT OF THE DISCLOSURE**

5           Methods of and compositions for pulmonary delivery of therapeutic  
agents which are capable of forming covalent bonds with a site of interest or  
which have formed a covalent bond with a pulmonary solution protein are  
disclosed. Therapeutic agents useful in the invention include wound healing  
agents, antibiotics, anti-inflammatories, anti-oxidants, anti-proliferatives,  
10       immunosuppressants, anti-infective and anti-cancer agents.
